Our  
Experienced  
Attorneys  
Listen to  
*Your Story...*

For more than 40 years, the trial lawyers at Searcy Denney have been standing up for the rights of victims harmed by traffic accidents, unsafe products, and business disputes.

We bring your case the experience, skills and resources that have enabled us to recover millions of dollars in verdicts and settlements for our clients.

Our fee promise is straightforward: **If there is no recovery we charge you nothing.**

Whether the case is played out in the boardroom or the courtroom, we field a team of aggressive attorneys and a large professional staff. We do not hesitate to go toe-to-toe with high-powered defendants or corporate litigators.

*...and to us, every client matters.*

PRACTICE AREAS

# Don't Face Your Accident Alone.

Hire a Florida Personal Injury Lawyer Who Cares.

## Personal Injury

Being injured in an accident is a painful and stressful experience and can raise complicated questions about who is to blame. Florida law gives accident victims the right to seek compensation from those responsible. Our personal injury attorneys have helped people injured in accidents recover millions of dollars in settlements and verdicts.

---

## Automobile Accidents

The Searcy Denney team of courtroom-tested attorneys, investigators, paralegals, former insurance claims managers, and former law enforcement officers has years of experience with auto and motorcycle crashes and other motor vehicle accidents. By doing our homework, we have helped hundreds of crash victims recover hospital costs, other medical expenses and lost wages.

---

## Brain Injuries

Traumatic brain injuries contribute to nearly one-third of injury fatalities. At Searcy Denney, our attorneys understand the intricacies of these complicated medical conditions, whether they are caused by a defective product, a medical mistake, an unsafe location, or an act of violence. We have the resources and experience to handle high-stakes claims.

---

## Trucking Accidents

The issues of large truck crashes are complicated: Technology can provide facts, but assessments of driver alertness and performance are more subjective and ownership and legal responsibility can be difficult. We tackle these complexities and do not hesitate to challenge the aggressive defense of big trucking companies.

PRACTICE AREAS

# To Us, Every Case is Personal.

Our attorneys and staff members will guide you through every step of the process.

## Business Disputes

Whether a dispute in business is over a contract, patent, copyright, trademark infringement, or fraudulent misrepresentation in the sale of assets or products, our attorneys are meticulous in their preparation and execution. In several precedent-setting cases, our commercial litigation team has stood up against some of the most powerful corporations and won.

---

## Product Liability

Makers and sellers of consumer products have a responsibility to meet health and safety standards, to warn the public of dangerous products, and to remove them from the market. But they don't always do this. We have represented hundreds of clients harmed when corporations put their profits ahead of consumer safety.

---

## Mass Torts

Our mass torts department has a record of substantial recoveries in mass torts cases - where many people are wrongfully harmed in a similar way by a similar product or event, such as a drug or medical device, manufactured item or widespread disaster. Each victim has an individual case, but benefits from shared research and efficiency.

---

## Property Liability

Death or serious injury can occur when unexpected conditions are dangerous at another person's home, business, vacant lot, or somewhere else. When this happens, our job is to determine which government standards and laws apply and gather the evidence we need to prove that these rules were negligently violated.

PRACTICE AREAS

# Victim of a Personal Injury?

Let Our Vast Experience and Resources Work for You.

## Medical Malpractice

When doctors or healthcare practitioners violate their oath to do no harm, victims who lose their lives or good health have a right to seek justice through our legal system. At Searcy Denney, we are prepared to marshal our experience, financial resources, investigative skill, and expert witnesses to stand up for our clients.

---

## Watercraft/Boating Accidents

Water lovers who enjoy sailboats, motor boats, jet skis and kayaks may risk catastrophic injuries or even drowning. Poorly maintained or malfunctioning watercrafts or inexperienced or inattentive operators can be the cause of these tragedies. Our experienced attorneys do not hesitate to hold the negligent parties accountable for boating accidents.

---

## Aviation Accidents

For more than 40 years, attorneys at Searcy Denney have worked on behalf of families involved in small plane, commercial airline, helicopter, and seaplane accidents. Some of our lawyers are licensed pilots whose knowledge of protocols, flight control practices, and federal agency systems helps us focus on the facts we need to win your case.

---

## Railroad Accidents

Railroad disasters are rare when railroad companies act responsibly, but budget and personnel cuts can result in inspections that are hurried or eliminated. At Searcy Denney, we know the laws and safety standards that apply to railroad because we have litigated cases on behalf of families devastated by railroad accidents.
